

WALL-Y Specification item

Vertical green wall formation through the fixing of self-supporting grids with double overlapping structure of irregular polygons in virgin HDPE type WALL-Y by Geoplast S. p. A. with dimensions of 58 x 58 cm, total thickness 7.5 cm (5 cm grid + 2.5 cm wall fixing foot).

The system may include a series of virgin HDPE trays with dimensions of 58 x 22 cm, height 20 cm, with holes on the bottom, designed to contain the chosen plant species.

WALL-Y must be permanently fixed to the wall by means of dowels: the tray must be plugged together with the grill, using the holes and spaces provided with the appropriate holes.

The price must include:

- Supply and installation of WALL-Y grids and related HPDE trays
- Planting of plant species
- Installation of the drip-water irrigation system
- Creation of support frame if it is not present

The quantity and positioning of the trays, the plant species to be planted and the installation of the drip-water irrigation system are at the discretion of the Works Department.
